SOIL HEALTH INTERPRETATION & NUTRIENT ADVISORY

Diagnostic Assessment: Light textured red sandy loam showing general macro-nutrient exhaustion and low organic matter reserve resulting from continuous cropping and light soil leaching.

General Nutrient Management Guidance: Incorporate green manure crops (Sunn hemp or Dhaincha) at 45 days. Apply 20% additional phosphatic fertilizer using Single Super Phosphate (SSP) combined with 15 t/ha enriched farmyard manure. Highly responsive to pulses, millets, and groundnut.
